REPORT ON “SKILL-DEVELOPMENT CODING COMPETITION V1.0”

Date: 18/05/2022

The Event and objective: A coding competition namely, **Skill-Development Coding Competition v1.0** was organized by the **Department of Electronics and Communication Engineering** with the help of Team **.CODE** (dotcode) on 17th May’22 under the guidance of our HOD Sir.

The aim was to upgrade the efficiency and for the **skill development** of the students in order to facilitate them in campus drive and placement activities as well as for their overall professional development.

More than 144 enthusiastic participants attended the contest. The participants were given two and a half hours to solve the given problems. The questions were designed to challenge the students and promote out-of-the-box thinking, problem solving and analytical thinking. We provided four problem statements on HackerRank, an online platform for coding competitions and practice. The score given is based on an online marking system.

The top 10 contestants who solved a greater number of problems, mindful of the test cases passed and fair time complexity, were selected.
